## Work History

---

**2021-10 - Current**

### Software Engineer

*Sky Betting and Gaming, Leeds, UK*

- Worked on Sky Bet Club, one of the most complicated and extensible promotions for Sky Betting and Gaming.
- Developed new code for different software projects, and ensured that it was well-tested.
- Supported code review, system integration, and validation in line with company requirements.

2021-02 - 2021-09

## Graduate Software Engineer

*The Hut Group, Manchester, UK*

- Worked with microservices in an agile programming environment using Java Spring Framework.
- Maintained the existing services and built new ones based on required features.
- Worked on a web application that tracked all work done by language translators contractors employed by our company.

2020-07 - 2020-09

## Game Server Developer

*Crucible, Sheffield, UK*

- Built a game engine and developed the servers for various types of slot games using an internal library, GDM game engine.
- Wrote well-designed, efficient and well-tested code to develop the backend of slot games.
- Participated in team projects, demonstrating an ability to work collaboratively and effectively with other people.

2019-07 - 2019-10

## Junior Java Developer

*UniCredit Services, Iasi, Romania*

- Worked on a project named TFO during an internship at UniCredit Services using Java 8 and data sets to transfer data from OCR reading to specific locations.
- Reviewed code and debugged errors to improve performance on the microservices used.
